Electronic Correspondence – As previously discussed, electronic communications should be maintained on Local Association accessible networks so that such communications regarding Association business can be preserved. If they have not done so already following my January 2022 communication Local Associations should immediately work with their municipality, fire district, fire department or fire company to establish these files. Association members should avoid using electronic communication options, such as text messaging, to conduct Association business because of the difficulties with preservation requirements.

While it is fine to have documents scanned as a backup, any document identified above with a lifetime preservation period must be maintained in a hardcopy form. Efforts to protect the documents from fire and flood damage should be made. Associations should also be wary of the electronic system being used for a backup. For example, a series of government agencies previously backed-up documents to disks and compact discs and are now experiencing difficulties finding computers that still read such devices. Further, “the cloud” is simply another computer in another location and efforts must be taken to ensure that all privacy is maintained if documents are being scanned and stored electronically.

Should you have any questions on the above or a document not listed, please call the State Office.
